

## INTEGRA 1222 - BACNET MSTP

### DIGITAL METERING SYSTEM

#### KEY FEATURES

- BACnet MSTP and Modbus communications
- User configurable IP addressing

#### BACnet MSTP Connection

The Integra 1221/1222 BACnet MSTP communication module supports connection to SCADA systems using the BACnet MSTP protocol and the Modbus protocol. The Integra 1221/1222 Meter with BACnet MSTP module acts as a slave device and may be queried by a master device which conforms to the BACnet protocol.

The Integra BACnet MSTP option module supports half duplex communication, initially at 38400baud, no parity 1 stop bit.

The module is fitted with a three-way screw terminal block to daisy-chain the BACnet communications cable. Standard RS485 communications cable should be used.

A key feature of the BACnet MSTP module is that it will communicate using BACnet MSTP or Modbus without any connections changes.

**Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.** Modbus and BACnet are trademarks

### Dimensions

PRODUCT CODES	
Part number	Description
OPT-1222-090	BACnet MSTP module for Integra 1222 digital multifunction meter

SPECIFICATION	
Input	
Material	UL 94-V0
Physical Connections	3-way screw terminal
Speed	9600, 19200, 38400 baud
