

Installation Instructions for Magnasafe - MS5, MS5-SS, MS7 & MS7-SS

Description

MAGNASAFE MS5 and MS7 safety switches are non-contact, magnetically operated switch and actuator. Designed to work with safety relays that have a low inrush current on the switch input, these switches provides an economical method of switching for the higher category, dual channel circuits.

These safety switches are available in a robust ABS, or 316 Grade Stainless Steel housing, and both switch and actuator are fully sealed to IP67 & IP69K making them suitable for use in wet or dusty environments. They are easy to install and tolerant to misalignment. With correct installation, these safety switches comply with the guidelines given in EN14119.

Magnasafe safety switches are designed to be used in part of safety related control system. A risk assessment should take place to establish that the specifications of these safety switches are suitable for the application required. See Technical Specifications below or contact Mechan Controls for further information.

KEEP THIS GUIDE FOR FUTURE REFERENCE

The information is designed to help suitably qualified personnel install and operate Mechan Controls safety equipment. Before using this product, read this guide thoroughly along with any relevant European and/or National Standards E.g. Machinery Directive 2006/42/EC and its Amendments, Provision and Use of Work Equipment Regulations. Further information can be obtained from Mechan Controls Ltd.

| Technical Specifications | MS5, MS5-SS | MS7, MS7-SS |
|--|---|---|
| Contacts | 2 NO or 2 NO + 1 NC | 1 NO + 1NC, 2 NO + 1 NC or 3 NO |
| Safety Contact Rating | 24Vdc / 300mA | 24Vdc / 300mA |
| Safety Contact Switching | 7mm ON / 17mm OFF | 7mm ON / 20mm OFF |
| Auxiliary Contact Rating | 24Vdc / 300mA | 24Vdc / 300mA |
| Auxiliary Contact Switching | 7mm OFF / 17mm ON | 7mm OFF / 20mm ON |
| Internal Fuse | - | - |
| External Fuse (<i>Customer Supplied</i>) | 0.2 Amps Fast Acting | 0.2 Amps Fast Acting |
| Construction | RED ABS, or 316 Grade Stainless Steel | RED ABS, or 316 Grade Stainless Steel |
| IP Rating | IP67 / IP69K | IP67 / IP69K |
| Operating Temperature | -25°C to +55°C (High Temp -25°C to +125°C) | -25°C to +55°C |
| Fixing | M4 Torx security screws (Tightening Torque 1.0NM) | M4 Torx security screws (Tightening Torque 1.0NM) |
| Connection | Pre-wired or M12 Quick Disconnect | Pre-wired or M12 Quick Disconnect |
| Vibration | 10 - 50Hz IEC 68-2-6 | 10 - 50Hz IEC 68-2-6 |
| Shock | 10g, 11ms IEC 68-2-27 | 10g, 11ms IEC 68-2-27 |

Dimensions

Mounting

Do not use safety switches as a stop. 1 mm separation when closed provides the best results.

Mount the switch on to the machine frame and the actuator on to the opening edge of the door.

Always try to mount the switch on non-ferrous material. (Ferrous materials may reduce the switching distance.)

EN14119: Hide the actuator where possible.

NOTES:

Minimum separation 50mm between adjacent switches

DO NOT mount on hinged side of the guard.

Operation

The MS5 & MS7 safety switches and actuators are designed to approach each other from most angles. When the guard is closed the targets on the printed face of the switch and actuator must be aligned.

Recommend Safety Control Unit

IMPORTANT

All control contacts should be externally fused.

Recommended Safety Control Unit Mechan Part Number: SRL-1 24VAC/DC or EM1 & ESM

Maintenance

It is recommended to check the safe operation of the switches and look for signs of damage or excessive wear on a weekly basis. Damaged units should be replaced or returned to the manufacturer for repair where practical.

Notes

In the interest of product development specifications are subject to change without notice. It is the responsibility of the user to ensure compliance with any acts or by-laws in place. All information regarding Mechan equipment is believed to be accurate at the time of printing. Responsibility cannot be accepted for errors or omissions.
