ANTIBACTERIAL SERIES

NEW

GET ALL THE BENEFITS OF MARECHAL® TECHNOLOGY + ANTIBACTERIAL PROTECTION!

The World Health Organization confirms that it is becoming harder and harder to treat bacterial infections. Regardless of the environment or industry, bacteria are everywhere to be found.

The risk of contamination or infection from surface transfer is significant. A single bacterial outbreak in an industrial plant or processing facility can be devastating.

NEW poly handles, treated with AG+ silver ions, provides a protective barrier and inhibits the growth of bacteria.

BENEFITS

Broad scope.

Applicable to all industries.

Wide range of applications.

The inorganic nature, small particle size and high temperature tolerance of the antimicrobial additive makes it ideal for use in many different application areas.

Durable.

The antibacterial additive offers permanent protection.

Safe to use.

The active agent complies with biocide regulation.

High performance.

Superior mechanical strength, IP66/IP67, UV protected.

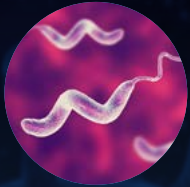

Easy, reliable identification.

Laser marking on the handle. No more stucked labels.

Logical protection.

Largest surface area of most manoeuvred accessory is AG+ treated.

**EFFECTIVE
AGAINST**

Campylobacter

Campylobacteriosis is an infection of the intestines. It is caused by the bacteria Campylobacter and occurs after eating contaminated food.

Salmonella

The infection usually occurs after eating contaminated food. Undercooked chicken or eggs are common examples.

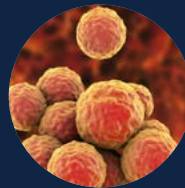

Pseudomonas

This micro-organism is particularly prevalent in hospitals and exposes patients with weak immune systems.

Listeria

Listeria monocytogenes (known as Listeria) is a type of bacteria commonly found in food and other natural environments.

MRSA

Meticillin-resistant Staphylococcus aureus (MRSA) is a type of Staphylococcus aureus that is resistant to certain antibiotics.

ANTIBACTERIAL TREATED HANDLES

Part number		Designation
511POD18AG		Poly handle with cable gland (9-18 mm)
511P6D18AG		60° poly handle with cable gland (9-18 mm)
512POD21AG		Poly handle with cable gland (5-21 mm)
513POD30AG		Poly handle with cable gland (10-30 mm)
51LP0D21AG		Poly handle with cable gland (5-21 mm)
511POD21AG		Poly handle with cable gland (5-21 mm)

New poly handles option now available on the following ranges: DSN1 20A - DSN3 32A - DSN6 63A - DS1 30A - DS3 50A - PN 30A - EVO 40A and MULTICONTACT ranges.
