DESIGN AND VIEW YOUR TROAX SOLUTION BEFORE ORDERING

JUST DRAWIT

Draw it yourself with our free online software tool. Troax Drawit is a new and easy tool for you to create the ideal solution. No software required, and just three easy steps from idea to quotation.

Or simply send us your drawing, layout, sketch or dimensions and we will design a complete layout to suit your requirements.

DATA CENTER-SERVER ROOM PARTITIONING

- » A Cost-effective And Flexible Solution.
- » Adaptable To Fit Any Height And Can Be Combined With Our Mesh Ceilings.
- » Allows Proper Air Circulation, Light And Sprinkler Penetration.

Our modular panel systems – with or without mesh ceilings – can be adapted to fit any height.

The mesh panels allow proper air circulation and can be built around existing installations and obstacles. Our offer includes mesh or steel sheet panels. The latter are primarily used to protect an area from view.

There are several solutions to provide a proper floor environment for computers and servers, as well as solutions to protect the area above a suspended ceiling.
